Re: Wildlife Refuge Security System Installation
Block 58.01, Lot 9.08; Gibbsboro, NJ
Permission to Install Security Shed and Utility Pole

Dear Mr. Mayor:

In accordance with Anne Levy's request, I would like to clarify our request to install a utility pole and security shed on the above-referenced block and lot, which is owned by the Borough of Gibbsboro (see attached figure). As you are aware, The Sherwin-Williams Company is conducting removal actions in Gibbsboro, New Jersey under an Administrative Order on Consent for Removal Action as directed by the USEPA Region II Removal Action Branch. A portion of the Wildlife Refuge is contaminated and a fence was erected several years ago to prevent trespassing. Recent breaches of the fence by trespassers have resulted in the need to install an electronic security system.

In order to complete the installation, a small shed (approximately 6'x6' footprint installed aboveground on cinder blocks) to house the security system and a utility pole to convey electric and phone service will need to be placed on the above-referenced block and lot. This security system is for the sole use of protecting the fenced-in wetlands portion of the Wildlife Refuge from trespassers and is only designed as a temporary installation until the site investigation and any remedial activities, if required, are completed. At this time, it is expected that the security system will be operational for five years.

Sherwin-Williams appreciates your attention to this matter as there has been a recurring problem with break-ins and we would like to get the system operating as soon as possible. If you have any questions or comments regarding this request, please do not hesitate to contact me at 216-566-1794 or via e-mail at mlcapichioni@sherwin.com.

Sincerely,

Mary Lou Capichioni
Director, Remediation Services

Encl.
